Min Jung Lee

Position

Master's Student
Graduate School of Artificial Intelligence
Pohang University of Science and Technology (POSTECH)

Contact Information

Research Interests

My research interests mainly focus on developing novel models and algorithms to address practical challenges in deploying artificial intelligence systems to various real-world applications. I am currently focused on the following topics:

- **Computational photography:** image restoration, image enhancement, camera ISP, burst photography.
- **LLM-based video understanding:** video summarization, video captioning, action anticipation, contextual understanding, leveraging LLM.

The application domains of interest encompass a broad range, including multi-modal learning (e.g., Vision-language, Visual QA, and image captioning) and LLM (e.g., fine-tuning LLM and prompt engineering).

Education

Pohang University of Science and Technology (POSTECH), Pohang, Korea

MS Student., Graduate School of Artificial Intelligence (GSAI) **Sep 2022 – Aug 2024**

- Advisor: Prof. Minsu Cho
- Cumulative GPA: 4.05/4.3 (97.5 / 100)

San Francisco State University (SFSU), California, U.S.

Exchange Student **Jan 2020 – May 2020**

- Cumulative GPA: 4.0/4.0

Chung-Ang University (CAU), Seoul, Korea

B.S., School of Electrical and Electronics Engineering (EEE) **Mar 2017 – Feb 2022**

- Advisor: Prof. Chang Ha Lee
- Honors: *Summa Cum Laude*
- Cumulative GPA: 4.31/4.5 (98.10 / 100, Rank: 11 / 201)

Research Projects

Samsung Advanced Institute of Technology (SAIT) Nov 2022 - Oct 2023
Non-uniformly exposed burst processing using robust base frame selector. (ISP Project)

Samsung Advanced Institute of Technology (SAIT) Sep 2022 - Oct 2022
Burst image enhancement in an extremely degraded environment by noise, blur and shift.

Term projects in coursework

- Deep Learning (AIGS538): Spring semester 2023
  Convolutional block attention module with regularization [pdf]
- Computer Vision (AIGS539): Fall semester 2022
  Fine-tuning strategies for semantic segmentation models [pdf]

Research Experience

Computer Vision lab. @ POSTECH Sep 2022 - present

- A video summarization framework that utilizes a Large Language Model (LLM) to select the most relevant frames based on a comprehensive context summary
- A frame selection model for burst image enhancement considering image features and motion information
- Synthetic RAW burst dataset under capturing non-uniform exposure from public video benchmark using inverse camera ISP
- Real-world RAW burst dataset under capturing non-uniform exposure using dual-camera system

Visualization lab. @ CAU Jan 2021 - Feb 2022

- An image enhancement network for reconstructing an HDR image from a single random exposure LDR image with U-net

Professional Activities

Teaching assistant
AI Trends (AIGS703C-01) @ POSTECH Fall semester 2023

Instructor
POSCO AI expert training course @ POSTECH June 2023 – July 2023

Engineering Experience

Projects

- An algorithm replacing the authentic fingerprints in images with the fake fingerprints using edge connect for biometrics security [pdf] June 2021 – Aug 2021
- A mobile application on Google Play Store "Food Timer" suggesting the ideal time for cooking depending on the kind of food to users Sep 2019 – Nov 2019
- A mobile application and built an Arduino circuit system for booking seat system for the pregnant in public transportation [pdf] Aug 2019 – Sep 2019

Honors and Awards

Dean's List with Department Honor Scholarship

- Top 1 in a department Spring 2021
- Top 10% in a department Spring 2019, Fall 2018, Spring 2018

Community Services

Student Worker @ SFSU Jan 2020 – May 2020

- Affiliated to IEEC (International Education Exchange Council)
- Promoted information sessions and social events among international students.

Language

Korean(native), English(fluent)

Skills

Programming Languages: Python
S/W Packages: PyTorch
